Theme Customizing: Color Scheme

Created April 22, 2020 | Author Rohit | Category BeAgency

BeAgency makes it very easy to brand and customize the appearance of your new website. In BeAgency you can easily change the colors of almost any website elements you need. BeAgency has a built-in color picker to simplify the color selection or you can use the hex values. The options to customize the theme's color can be found under **Appearance -> Customize -> Color Scheme**.
