Theme Customizing: General

Created April 22, 2020 | Author Rohit | Category BeOnePage

Here you can set Site Title, Front Page and Posts Page. Also customize the Page Loading Transition, Sticky Menu, Scrolling Progress Bar and Go to Top Button.

- **Page Loading Transition**. You can show the interactive loader while the page loads in the background.
- **Sticky Menu**. If enabled, the menu will be accessible from anywhere without having to scroll.
- **Go to Top Button**. If enabled, when a user scrolls past a certain point on a web page, this helpful button appears, enabling users to easily return to the top of a page.

> *Note*
>
> *There is no live preview when you change the options for **Page Loading Transition**. After you have saved the changes, you will need to refresh the page without **Customizer** to see the changes. **Go to Top Button** will be hidden on mobile devices even when you have enabled it.*
